

ELP 910VTo

VoIP Entry / Intercom Panel

The Condoplex ELP 910VTo is a VoIP Entry / Intercom Panel for multi residential properties and office towers. A Stylish 10" sized gesture-controlled touch screen provides a modern look and feel to the buildings wherever it is placed. Slide Shows, Various "Themes" Live News Casts & Weather info further enhance the user experience. "Hot" buttons may be programmed to connect directly to building services.

The ELP910 provides Lobby Door and/or Elevator Floor Restriction. A built-in speaker, microphone and camera permit two-way audio / video calls to a smartphone or guard station.

When operating as an Intercom Station, up to 8 buttons may be placed onto intercom to reach various building staff.

Multi-Building Support

When multiple buildings are located on a site, communications may be routed to particular buildings. For example, a site with 3 buildings, may have an intercoms with 3 buttons, one for each building. Furthermore, if the visitor calls building 2 and the guards does not answer in 20 seconds, the call will be broadcasted to the other two guards, so as to not impeded entrance into the facility.

- Android based Architecture
- Internet/Intranet Accessible
- Automated Internet Updates
- Health Monitoring / Remote Diagnostics
- SIP/ VoIP PBX Services
- Customizable User Interface
- Carousel for Custom Presentations
- Mobile App for Guards or Residents
- 7x24 hour streaming to Guard Stations
- Audio/Video Calls to the Guard Station
- Multi-Lingual
- Access/Elevator Control Integration
- Dedicated buttons for Security, Concierge, Emergency (EMS) and Customer Care

Audit-Log

All events are logged for every visitor accessing the Panel as a Entry Phone or Intercom. Guards answer calls through a centralized communications interface. Multiple calls are queued to ensure guards do not miss any call. If a call is not answered immediately by the guard they will be marked as missed and they may simply click on a call line to connect back to the Panel.

SIP-VoIP to Outside Lines

The Entry Phone provides two primary modes of communication: VoIP and APP based Services, thus permitting the lowest cost installation and highest possible feature set for building staff and residents. VoIP Services are fully integrated with this product, offering these benefits: Free CallerID and 8 to 20 simultaneous voice channels to eliminate BUSY signals and reduced monthly line charges.

Smartphone APPS

APPS for the iPhone and Android provide additional benefits of video verification direct communications to building staff. Upon receiving a call from a visitor, residents will first receive a Still image of the visitor to be given an opportunity to accept or reject the call.

Software

Web based, this product does not require any client software to be Installed on a PC. Changes to the directory may be made on-site over a LAN or remote from the Internet. Cloud services are available to provide automated back-up and monitor the health of your Entry Panel. A concierge software package is included to permit communications and configuration.
